Summary

An IT professional with 3 years of technical experience, currently making a transition into UX Design while pursuing a Master's degree in User Experience (expected graduation August 2027). Brings a unique technical perspective to design challenges, from understanding system constraints to advocating for the end user. Eager to contribute to UX teams through research, wireframing, and usability testing while completing graduate studies.

Education

Lynn University — Boca Raton, FL
Master of Science in User Experience Design — *Aug 2027*

Florida Polytechnic University — Lakeland, FL
Bachelor of Science in Computer Science — *Aug 2023*

Experience

Local Finance — *Jun 2023 – Present*

IT Manager (Jul 2024 - Present)

- Orchestrated a full-scale database migration of 1,200+ active and closed loans from a legacy system to a modern loan management platform, coordinating cross-functional stakeholders and monitoring post-launch performance to ensure system integrity
- Facilitate cross-functional collaboration across departments to align on project goals, translating technical requirements into clear deliverables for both technical and non-technical stakeholders
- Oversee the ongoing consolidation of loan records, coordinating with stakeholders to validate data accuracy and maintain business continuity throughout the transition

IT Developer (Jun 2023 - Jul 2024)

- Led the integration of a third-party payment system, expanding payment options for **600+** customers and improving the end-to-end customer experience
- Analyzed internal business workflows and developed automation scripts (Python, C#) to reduce operational friction and improve efficiency for end users
- Managed data flows across third-party integrations, maintaining pipeline integrity and ensuring consistent, reliable information exchange between platforms

UX Projects

Was It Worth It? - UXD 550 Progressive Interface Design — Jun 2026 – Jul 2026

- Designed and tested a habit-reflection app addressing compulsive social media use, from problem framing through a 9-participant mixed-method usability study
- Ran 6 moderated and 3 unmoderated sessions across a 24–70 age range, uncovering 3 critical pain points
- Identified a core navigation flaw causing 57% task failure on the app's key data screen, then proposed a redesign prioritizing legibility and clear exit states
- Synthesized pre and post-test survey data (2.8 hrs/day avg. usage, 100% reporting lost time) to validate problem significance and reframe product scope

WINK - UXD 520 Prototyping and Usability Testing — Mar 2026 – May 2026

- Designed a mobile dating app from research through a high-fidelity prototype
- Conducted two rounds of moderated usability testing (10 participants total), iterating from low-fidelity wireframes to an interactive Figma prototype
- Reduced average task-completion time by 63% between testing rounds by simplifying navigation and clarifying iconography
- Achieved 9/10 average user satisfaction and 9.2/10 task-intuitiveness rating in final usability testing

Technical Skills

UX Skills: User Interviews, Usability Testing, Prototyping, Information Architecture, HCI
Languages: Python, JavaScript, HTML, CSS
Developer Tools: VS Code, Visual Studio, Figma, UX Tweak
